The North Carolina Leadership Academy for Wellness and Smoking Cessation Summit
Holiday Inn Raleigh-Durham
Morrisville, NC
August 17-18, 2011

ACTION PLAN

Background & Introduction

On the evening of August 17th and all day August 18, 2011, forty-two leaders in public health, behavioral health, and tobacco control came together for a first-ever North Carolina initiative focused on reducing smoking prevalence among people with behavioral health disorders. The summit was supported by the Substance Abuse and Mental Health Services Administration (SAMHSA) and the Smoking Cessation Leadership Center (SCLC) as part of the Leadership Academies for Wellness and Smoking Cessation. The purpose of the summit was to design an action plan for North Carolina to reduce smoking and nicotine addiction among behavioral health consumers and staff, and to create an environment of collaboration and integration among the fields of public health (including tobacco control and prevention), mental health, and substance abuse services.

The summit began with dinner and a Gallery Walk on August 17, 2011. Steve Jordan, MA, Director, Division of Mental Health, Developmental Disabilities and Substance Abuse Services, and J. Luckey Welsh, FACHE, Director, Division of State Operated Healthcare Facilities welcomed participants to the Summit. Mr. Jordan stated, “It is a golden opportunity for us, North Carolina, to lead with an action plan. When the opportunity came for us to determine if we wanted to be part of the Leadership Academy, I said, ‘Yes.’” He added, “We have to work with the providers, families and patients to provide better interventions and change the culture. Together, we can eliminate the isolation of people with mental illness that contributes to smoking.”

Mr. Welsh stated, “I hope that we will put together an action plan that we can implement in our community and facility settings across the state. We can do it. On that note, let’s get to work!”

Flo Stein, MPH, Chief, Community Policy Management Section, NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services, DHHS, also spoke to summit attendees. Flo added, “Thank you all for being here. I just got back from the SAMHSA Advisory Council Meeting, and a lot of people asked about North Carolina. They asked how we can do
the things we do. It’s because we have excellent leaders. There are many of you in the room who are pioneers.”

Participants represented federal, state, and local agencies, including mental health, addictions, consumer, community services, non-profit, academic, quitline, and chronic disease prevention organizations (see Appendix A, participant list). Leaders at the summit were well-aware that people with behavioral health disorders are disproportionately burdened by the harmful effects of smoking and tobacco use, and each partner committed to the work, target, and strategies established at the summit. In a discussion led by seasoned facilitator, Jolie Bain Pillsbury, Ph.D., each partner expressed their interests in the Academy summit. Themes that emerged from the groups’ interests in being at the summit were data, youth, action plan for change, training and education, networking, policy and systems changes, and consumer-focused strategies (see Appendix B).

On the morning of August 18, 2011, participants began the day with overnight reflections. They were excited to move forward and felt optimistic about the day ahead. One of the participants noted, “What I saw is that the leadership is here. That makes a big difference and that impresses me. I know that when we start with the leaders, we can easily trickle things down.” Another participant said, “I was struck by the huge potential we have to make an impact on people’s lives and reduce the prevalence rates.”

Mr. Jordan and Mr. Welsh provided opening remarks as well. Their presence at the dinner and the following day showed their dedication to the cause. Mr. Jordan reflected, “This brings us back into why we went into the field. We want to help people live better and healthier lives.” Mr. Welsh also offered this call to action, “As we look at where we are and where we want to be, I think first on, what can we do? We have the right people in the room with the competencies to do this. We have many people who represent different agencies. Then, I reflected back on the challenge Dr. Steve Schroeder gave to us last night, and I believe North Carolina can be a leader. If we move below the national average, we can show the nation that we can all do better.”

Steven A. Schroeder, MD, Director, Smoking Cessation Leadership Center, presented on research on smoking prevalence, health effects, and innovations in the management of smoking cessation.

By the end of the summit, North Carolina partners answered the following questions that framed the Action Plan.

1. Where are we now? (baseline)
2. Where do we want to be? (target)
3. How will we get there? (multiple strategies)
4. How will we know if we are getting there? (evaluation)
The following Action Plan details the group’s baseline, target, recommended strategies, and next steps.

**Question #1: Where are we now (baseline)?**

Partners adopted the baseline measure of smoking rate among North Carolina general population at 19.8% (*Source: North Carolina Behavioral Risk Factor Surveillance Survey*); adult mental health clients at 49.0%; and 63.0% for adult substance abuse clients (*Source: DMHDDSAS NC Treatment and Outcomes Performance System*) (*See Appendix C*).

**Question #2: Where do we want to be (target)?**

The partners adopted the target to reduce smoking prevalence among the general population to 16%; adult mental health clients to 39%; and adult substance abuse clients to 50%, each by end-of-year 2016. The term “16% by 2016” was coined by participants.

<table>
<thead>
<tr>
<th>North Carolina Clients</th>
<th>General Population (Ages 18 and Up)</th>
<th>Adult Mental Health Clients</th>
<th>Adult Substance Abuse Clients</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline (2010)</td>
<td>19.80%</td>
<td>49.00%</td>
<td>63.00%</td>
</tr>
<tr>
<td>Target (2016)</td>
<td>16.00%</td>
<td>39.00%</td>
<td>50.00%</td>
</tr>
</tbody>
</table>

Agreement: Mental health and substance abuse data are at initial interview. Consider using quitline referrals by providers to track strategy implementations. Consider a youth-focused summit in future; target for youth smoking rates in North Carolina Healthy People 2020.
**Question #3: How will we get there? (multiple strategies)**

North Carolina partners adopted six overarching strategies to reach the target:

<table>
<thead>
<tr>
<th>Adopted Strategy Groups</th>
</tr>
</thead>
<tbody>
<tr>
<td>Facilities</td>
</tr>
<tr>
<td>Provider Training &amp; Education</td>
</tr>
<tr>
<td>Consumers &amp; Community</td>

<td>-Develop program</td>
<td></td>
<td>-6 months (Feb. 2012)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## 2) Program model should include staff smoking issues

- Develop specific smoking-cessation resources for staff
- Develop HR policies

- OSP (for state facilities)
- Public Health: technical assistance for private/contracted facilities

- 6 months (Feb. 2012)
- Decreases overall smoking rate
- Supports smoking cessation for consumers
- Employee absenteeism

## 3) Outreach to non-state facilities to share program model and lessons learned

- DSOHF/DMH collaborative to accomplish:
  - Regional community meetings
  - AHEC trainings
  - NC Council of Community Programs Conf.
  - NAMI/Advocacy Conferences
  - Web site containing all developed information on developing smoking cessation programming

- DSOHF and DMH/DD/SAS
- Public Health for Tech. Assistance

- 1 year (Sept. 2012)
- Facilitates consistent programming and core measures across system
- Number of private/contracted MH/DD/SAS facilities that are tobacco free

## 4) Develop program model for use in MH/SA settings

- Review current assessment tools
- Identify core concepts to include in model

- DSOHF Facilities and Public Health

- 6 months (Feb. 2012)

## 5) Include tobacco free programming in 3-way contracted facilities and

- Utilize TF programming models developed in State Operated

- DMH/DD/SAS and contracted providers

- TBD once State Operated Facilities implement TF

- Expands TF environments to more
- Number of contracted facilities that implement

Closing Remarks

Thank you all for being here. We were very honored to receive this invitation from SAMHSA and SCLC. We were worried, “Will everyone show up?” It’s wonderful that you have participated in this summit.

I’m happy to announce that Margaret Brake will be leading this initiative to sustain the momentum. Dr. Janice Peterson is the President of the National Prevention Network for all states and she can help us to move the quality improvement team forward and talk about the action plan.

I would like to thank the planning team and members of the SCLC. Thank you to Luckey Welsh and Steve Jordan, as well as Dr. Steven Schroeder, distinguished professor at UCSF.

When we get the opportunity and the right people in the room, we do the right thing. We are committed and we’ve said what we will do. This is about low-cost, no-cost strategies, especially in times of our current economic environment. We have many, many things that we can do without money. We can share resources and also look for resources that need to be replaced.

Go back to your office tomorrow and get started.
Appendices

Appendix A – Participant List

Kimberly Alexander-Bratcher, M.P.H.
Project Director
NC IOM
Keystone Office Park
630 Davis Drive, Suite 100
Morrisville, NC 27560
Office: 919-401-6599
Fax: 919-401-6899
E-mail: kabratcher@nciom.org

Kerry Bird
Program Coordinator
NC Commission of Indian Affairs
1317 Mail Service Center
Raleigh, NC 27699
Office: 919-807-4447
Fax: 919-807-4461
E-mail: kerry.bird@doa.nc.gov

Kymberlee Anderson, B.S.W., QP
PSR Mentor, QP
LeChris-Beach House Psychosocial Rehabilitation
301 Maple Lane
Morehead City, NC 28557
Office: 252-726-9732
Fax: 252-726-9146
E-mail: caimyn@yahoo.com

Margaret Brake, M.H.A.
Program Manager
Division of MHDDSAS
3021 Mail Service Center
Raleigh, NC 27699-3021
Office: 919-715-5989
Fax: 919-508-0988
E-mail: margaret.brake@dhhs.nc.gov

John Bigger, M.S., LPC
Administrator, MH Continuing Ed.
Southern Regional AHEC
1601 Owen Drive
Fayetteville, NC 28304
Office: 910-678-7207
Fax: 910-678-0126
E-mail: john.bigger@sr-ahec.org

Missy Brayboy
Director, Community Services Program
NC Commission of Indian Affairs
1317 Mail Service Center
Raleigh, NC 27699
Office: 919-807-4440
Fax: 919-807-4461
E-mail: missy.brayboy@doa.nc.gov

Donna Dayer, B.S., RRT, CTTS
Tobacco Treatment Specialist
Tobacco Prevention and Control Branch
NC Division of Public Health
5605 Six Forks Road
Raleigh, NC 27690
Office: 919-707-5415
Fax: 919-870-4844

Maria Fernandez, Ph.D.
Planner/Evaluator
Division of MHDDSAS
3004 Mail Service Center
Raleigh, NC 27699-3004
Office: 919-733-0696
Fax: 919-715-3604

### Appendix B – Interests

<table>
<thead>
<tr>
<th>Interests &amp; Desired Results</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DATA</strong></td>
</tr>
<tr>
<td>The result I want to get out of today results around data for veterans.</td>
</tr>
<tr>
<td>Interested in more data on American Indians and bringing down smoking rates.</td>
</tr>
<tr>
<td>When I do WRAP, there is discussion of wellness tools for consumers. The wellness tools should address smoking for consumers. We need more data and to change the culture.</td>
</tr>
<tr>
<td>Interested in better collection of data as it relates to American Indians to help tailor strategies for those with behavioral health issues, and to reduce use of commercial tobacco products.</td>
</tr>
<tr>
<td><strong>YOUTH</strong></td>
</tr>
<tr>
<td>Work in early intervention team, focus around children and adolescents with serious mental illness. Concerned about children and their heath related to experimenting with risky behaviors in response to peer pressure. Interested in how we can affect changes in the system in the community.</td>
</tr>
<tr>
<td>Interested in results for youth and prevention. Family members have passed away due to tobacco. Interested in healthier families.</td>
</tr>
<tr>
<td><strong>ACTION PLAN for CHANGE</strong></td>
</tr>
<tr>
<td>Interested in seeing concrete ways that behavioral health culture can change in NC.</td>
</tr>
<tr>
<td>Interested in finding more about interventions. We’ve been trying smoking cessation interventions actively in the last 4 years but have had difficulty in creating an impact.</td>
</tr>
<tr>
<td>Interested in an action plan that will lead to norm change with regard to smoking in the behavioral health population.</td>
</tr>
<tr>
<td>I’d like to walk out of here with a “clear” vision about how we can change the way we deliver services in our community and educate people</td>
</tr>
<tr>
<td>The result I’d like to see is the wedding of good interventions and ways to communicate that this treatment can be effective to providers and psychiatrists, as well as training other tobacco treatment specialists and effective messaging with family and community.</td>
</tr>
<tr>
<td>Very interested in health disparities issues specifically to what are the tools and resources we can use with our network of community providers. Interested in how we can be more creative to create a sense of urgency and make something happen.</td>
</tr>
<tr>
<td>I am appalled that the people we serve are dying earlier and are sicker than the general population. I’d like to develop a plan to see people live healthier lives.</td>
</tr>
<tr>
<td>Look forward to seeing the action plan to drive down prevalence in behavioral health population in NC.</td>
</tr>
<tr>
<td>We’ve been working with SAMHSA to develop these action academies in now the 5th state. NC can be a real national leader in reducing tobacco prevalence. Smoking rates in NC are less than people think they are, and if we can have more success here, we can motivate other states to do the same.</td>
</tr>
<tr>
<td>Interested in the technical assistance tools we can offer for NC moving forward.</td>
</tr>
<tr>
<td><strong>TRAINING &amp; EDUCATION</strong></td>
</tr>
<tr>
<td>Focus on training. Interested in in how we can work to deliver training to those delivering smoking cessation interventions.</td>
</tr>
<tr>
<td>Interested in work with training on evidence-based practices for providers.</td>
</tr>
<tr>
<td>I want to teach my primary care doctors to use motivational interviewing and address smoking.</td>
</tr>
</tbody>
</table>
I would like to have a plan for additional training, and then have a resource list so that people can be linked effectively to resources to be successful.

**NETWORKING**
Interested in looking at how we can continue to collaborate, particularly among the people in this room, and how we can reduce tobacco prevalence.
Building on prior positive outcomes, especially with middle school and adolescents, we hope to have similar success in tobacco cessation for this population and to improve our program and efforts.
I’d like to see better connection between facilities and inpatient services and the community, whether it be the quitline and the community clinic, etc.
Interested in seeing how we can all work together to close the gap between smoking rate for this population and the behavioral health population.
Interested in networking and developing new and stronger partners to treat tobacco in this population.
Had a successful pilot at Broughton Hospital. I’m interested in continuing our momentum and sharing best practices so that we can provide leadership for the state.

**POLICY & SYSTEMS CHANGE**
Study health issues and find out more about how recent policy changes can progress in NC, despite not-so-positive changes in our current climate and budget challenges.
Interested in evidence-based processes & informed practices on how they can be integrated.
We went smoke free April 1 of last year. No joke. We have a tremendous issue on contraband on contraband. I would like ideas on how we can handle that issue and minimize the impact on the treatment milieu.
We have 14 facilities. Want to go campus-wide smoke free in all facilities and replicate the 2 successes we’ve had so far. Want to learn new tools to make this happen.
Advancement of policy is what I’m interested in. I’d like to see us build upon momentum in our state that would create significant benefit for the behavioral health population.
It is unfair that people in our institutions don’t get the same treatment that those in community hospitals receive. I want to see how we can take the successes at Walter B. Jones and see it in other facilities.

**CONSUMER FOCUS**
I want to see consumers have the information to make better-informed decisions about smoking.
Our constituents die 25 years earlier than the general population. I am interested in providing the services, the support, and the advocacy to help them make informed choices and live healthier, longer lives.

**Day 2 -- Additions**
Hope to help shift polices to help shift the decrease in prevalence among people living with mental illness and substance abuse disorder.
Hope to incorporate what I get out of today into our hospitals.
One of the things I want to take back with me is, “How do we fully engage people who are suffering mental illness to separate them from tobacco addiction. They are more apt to get treatment for mental illness but not tobacco cessation.
Provide 24 hour services be able to help people become none smokers.
Appendix C – Baseline Data

Current Smoking Among North Carolinians Age 18 and Up: 2000-2010

![Graph showing current smoking among North Carolinians from 2000 to 2010.](image)

Source: North Carolina Behavioral Risk Factor Surveillance System (BRFSS) 2000-2010
*Current smoking is defined as having smoked more than 100 cigarettes in one's lifetime and currently smoking everyday or some days."

Smoking among Adults with Substance Use Issues and Mental Health Issues Served by DMHDDS at Initial Interview

![Graph showing smoking among adults with substance use issues and mental health issues from 2006 to 2010.](image)

Source: DMHDDS NC Treatment and Outcomes Performance System

Appendix C – Group Conversations on “Initial reactions to the North Carolina Gallery Walk?”

**TABLE 1**
- Concerned about the leadership on the state level needed to push education and policy interventions to begin to make changes statewide.
- Need for more medical personnel, i.e. doctors to be involved in policy and interventions.

**TABLE 2**
- Pleased with the prevalence in relation to the nation.
- Noted that prevalence among behavioral health population was high compared to the general population.
- Concern re: Was positive trend due to funding? If funding ends, will that impact the trend? I.e. quitline cuts?
- How to sustain norm changes?
- Alarming high rate of smoking in American Indians.
- Providers are not doing a good job to help patients quit smoking.
- Substance abuse prevalence going down after 3 months was nice to see, but mental illness prevalence is holding steady. Could be changed with education.

**TABLE 3**
- Striking to see amount of money spent in Medicaid in NC. That # is going to increase. Many of us working in NC are cognizant. That number can be very frightening in the future.
- In terms of substance abuse, we need to do more education, as well as education for the recovering community. Change the education and philosophy.

**TABLE 4**
- Pleased that NC weren’t as high as we thought we would be in terms of prevalence.
- Glad to see decline in adolescent prevalence.
- Not-so-positive side – sobering to see the high rates of smoking in the behavioral health populations. There is a disparity between the general population and the mental health/substance abuse population.

**TABLE 5**
- Similar to table 4
- Surprised that rates both in mental health and substance abuse are lower than we expected.
- Noticed decline in the substance abuse prevalence but not in the mental health population, maybe due to lack of public service announcements and effective interventions.
